Wind Energy has never been so easy....

Introducing the New 29´(8.8 m) EZTM-Tower for AIR XTM wind generators

Installs in under two hours*

Installing small wind systems just doesn't get any easier than this. The EZ™-Tower comes with all the parts needed with the exception of the power wire.

- No Concrete
- No Gin Pole
- No Winching

Entire kit ships in 74" box, weight is 80 lbs. Fully engineered to 110 mph winds! Galvanized tubing, cable and hardware. Ships via UPS anywhere

* Installation times may vary depending on experience and soil conditions.

All materials included - even pipe!
